Hiring Manager  
Stefanini

**Java Full Stack Developer**

Dear Hiring Manager,

I am excited to apply for the Java Full Stack Developer position at Stefanini Group. With 12+ years of experience building, testing, and maintaining enterprise software, I deliver robust, user-focused solutions across the full development lifecycle.

I have extensive experience with object-oriented development, Java, Spring Boot, REST APIs, and modern front-end frameworks including Angular and TypeScript. At Superior Technologies Research, I led the delivery of a business-critical HR platform, driving CI/CD, automated testing, and system integration. My roles at eoStar and Calder Solutions further strengthened my skills in legacy enhancement, TDD, and continuous improvement.

I am practiced in Agile, Lean, and XP disciplines, including paired programming and test-first development. I have worked closely with cross-functional teams to design and implement scalable, secure systems, and am comfortable with SQL, PostgreSQL, and automated testing tools such as Junit and Jasmine.

I am passionate about adopting new technologies, optimizing performance, and supporting secure, high-quality development. My collaborative, agile approach and experience in regulated industries make me a strong fit for your team.

Thank you for your consideration. I look forward to contributing to Stefanini's mission and supporting innovative, business-critical solutions.

Sincerely,

Marvin Kassabian
