Sony Interactive Entertainment
Hiring Team
Software Engineer II Position

Dear Hiring Manager,

I'm writing to express my interest in the Software Engineer II position at PlayStation. With over 12 years building cross-platform applications, I'm excited by the opportunity to develop React and React Native-based experiences for desktop and mobile environments.

My experience directly aligns with your requirements:

- **Cross-platform mobile development** at eoStar, building iOS applications with native integrations

- **Collaboration with Product Owners** to translate requirements into maintainable code

- **Proficiency in React, TypeScript, and testing** with Test-Driven Development principles

- **Experience with containerization and CI/CD** using Docker, Kubernetes, and GitLab pipelines

- **Full-stack development** with Go, ASP.NET Core, and REST APIs

I'm confident my background in cross-platform development and commitment to quality engineering would allow me to contribute effectively to your team.

Thank you for considering my application,

Marvin Kassabian
